Multidisciplinary designer with an architecture background and experience in UI/UX, visual design, video production, and content operations. Skilled in turning complex ideas into clear, user-centered visuals through research-driven design.

EDUCATION

The University of Hong Kong

HongKong

Master, majoring in Master of Science in Advanced Architectural Design Programme

Jan. 2025 – Dec. 2025

Jishou University

Hunan, China

Bachelor, majoring in Environmental Design

Aug. 2015 – Jun. 2019

TECHNICAL SKILLS

Design & Creative: Figma · Adobe XD · Photoshop · Illustrator · InDesign · Premiere Pro · After Effects

UI/UX & Prototyping: InVision · Axure RP · Sketch

Architectural & Technical Tools: Rhino · AutoCAD · SketchUp · ArcGIS

Data & Workflow Tools: Notion · Jira · Trello · Google Workspace · Excel · SQL

Media & Production: Premiere Pro · After Effects · DaVinci Resolve · OBS Studio

WORK EXPERIENCE

Tony Ip Green Architects Ltd.

May. 2025 – Jun. 2025

Architect assistant Intern

HongKong

- **AI for Sustainable Architecture:** Spearheaded the content and visual development for a conference presentation on AI applications in sustainable architecture, incorporating 10 Hong Kong case studies and data visualizations, which successfully increased the clarity of complex architectural concepts by 50%.
- **Project Proposal & Visual Communication:** Designed key diagrams and posters for project proposals, and by optimizing information hierarchy, improved client and stakeholder comprehension of technical data by 30%.
- **Research & Knowledge Base:** Researched and compiled a comprehensive case study database of recyclable materials to provide data-driven insights for sustainable design solutions; this resource was subsequently utilized in at least 3 preliminary design proposals.
- **Translation & Documentation:** Standardized and localized technical documents, including BEAM Plus standards, enhancing the efficiency of internal communication processes by 50%.

TAL Education Group

Oct. 2024 – Jan. 2025

Strategy and Operations Intern, Team 1 Online Learning Division

Beijing

- **Xueersi AI Study Machine UI/UX:** Contributed to the UI/UX design of the Xueersi AI Study Machine. Based on qualitative user feedback and quantitative data analysis, redesigned 2 key pages, which helped increase user engagement and course completion rates by 10%.
- **Primary School Course Content Strategy:** Developed the visual and content strategy for primary school courses, designing communication assets like SOP materials, marketing posters, and social media visuals to ensure consistency across all user touchpoints.
- **Internal Workflow & Tooling:** Analyzed and provided recommendations to optimize internal workflows, focusing on improving the user experience of company project management and operational software. This work aimed to enhance team collaboration and work efficiency.
- **User Research & Feedback Loop:** Conducted in-depth analysis of user feedback channels, providing 2 actionable insights to product and design teams, directly influencing product feature iterations.
- **Competitive Analysis & Market Insights:** Performed competitive analysis on rival EdTech products, focusing on product features, user experience, and market positioning. Presented key findings and strategic recommendations to management to improve our own customer engagement and retention efforts.

China Railway Urban Construction Group Corporation Limited

Jan. 2019 – Mar. 2019

Intern, 13th Project Department

Shanxi Province

- Provided hands-on support to designers by organizing and archiving 20 technical materials to streamline project flows.
- Proactively completed support tasks, reducing the non-core workload for senior staff by approximately 10 per month, enabling them to focus on critical project work.
